

Zolo Website - Test Cases

You need to submit your assignment as a git repository for testing the scenarios mentioned below. You can refer to this [screenshot link](#) to get visual understanding of the project. Your code should support cross browser compatibility with Chrome, Edge, Safari & Firefox browser with maximum test coverage.

Credentials

You can use the following credentials for logging in:

URL: <http://52.201.90.154:9002/>

Username: 7777774001

Password: 123456

Part-1

You need to write test cases for logging in, shortlisting a property and then scheduling a visit for a future date & time.

1. Open "<http://52.201.90.154:9002/>" >>
 - a. Log into the website with provided credentials
 - b. Select search field >>
 - c. Type "Electronic" >>
 - d. Then select "Electronic City Phase II, Bengaluru, Karnataka, India" from auto suggest option
2. Verify the search result >>
 - a. Apply filters: ('Budget: 5000-8000','Sharing Preference: 2 Sharing','PG Type: Men') >>
 - b. Select "Zolo Goodfellas for men" >>
 - c. Open property details >>
 - d. Verify the items on the page.
3. Complete schedule a visit flow >>
 - a. Click on Schedule a Visit button >>
 - b. Select future date and time >>
 - c. Get confirmation of scheduled visit

Part 2

You need to write test cases for completing booking a double sharing room in one of the properties.

1. Go to your shortlisted property >>
 - a. Click 'Request a Bed' >>
 - b. Select any future date from calendar >>

- c. Select 2 sharing room >>
 - d. Proceed to join waitlist/confirmed booking
2. On Payment page >>
 - a. Verify 'Name','Phone' >>
 - b. Check for the promo code option >>
 - c. Enter promo code and apply for code >>
 - d. Proceed to make payment >>
 - e. Choose payment and complete payment
3. Verify that on success page Return home' link is available
4. Go to Menu options >>
 - a. Select Booking >>
 - b. Verify the booking details
